Experience

Harwich Haven Authority (2009–present)

To ensure that HHA have appropriate IT systems, networks, infrastructure, processes and procedures in place to meet the needs of the business. Responsibilities include:

- Reporting directly to the CEO
- Providing support within the bounds of strict support level agreements
- Liaising with staff and suppliers to ensure the efficient and appropriate application of technology
- Management of large ICT projects
- Development of internal systems and integration solutions

Achievements

HHA Website (www.hha.co.uk)

Though simple in appearance, the HHA website utilises large amounts of technology (including AJAX, Flash and SOAP) to provide visitors with the information they want and keep maintenance effortless.

MIS Online

A web based version of the Atlas MIS created to allow for external access to important information and creation of data to reduce load on internal staff, including SOAP interfaces for system to system communication.

Library

A web based system to centralise the management of document propagation. As well as public and authenticated document access, the system offers an AJAX interface to feed websites/intranets. An alert system provides daily update reports to users and public subscribers.

Experience (continued)

Unique Identity (2002–2009)

To develop high quality web based systems and provide IT services to small-medium sized businesses. Responsibilities included:

- Creating web sites from design to implementation
- Installing new and maintaining existing IT infrastructures
- Developing software solutions based on customer requirements and defined through detailed and thorough business analysis
- Developing integration solutions for existing systems
- Consultancy on a wide range of IT and software development projects

Felixstowe Marine Electronics (2001-2002)

To design and implement a local community website and maintain existing IT infrastructures both in-house and for FME customers. Responsibilities included:

- Designing, implementing and maintaining a number of websites
- Installation and Maintenance of a small internal network
- Maintenance and expansion of a medium sized customer network
- Developing and maintaining a customer information system

Education

2 'A' levels and 8 GCSE's including Maths, Science and English

Interests

I play piano and enjoy listening to and composing music. I take pleasure in reading and watching films and have accumulated a large collection of books and DVD's.
